Manifold Plumbing System

HOME RUN

Manifold PEX Plumbing System

Make It A Home Run Everytime

Vanguard
Piping Systems, Inc.
A Viega Company

The #1 selling PEX manifold in North America offers the Greatest Flexibility!

The MANABLOC is designed to incorporate PEX Press, Press Crimp or Compression connections for both supply and distribution lines. Installers can now choose their preferred connection method from any one of the following options:

- PEX Compression Connections
- PEX Bronze Press Connections
- PEX Brass Crimp Connections
- PEX PolyAlloy Crimp Connections

These connection options along with the newly developed mounting brackets for the MANABLOC make it even easier to install and allow the user to customize the MANABLOC for the application or installation method they prefer.

Combined with ViegaPEX flexible tubing the MANABLOC offers many benefits to both the installer and the homeowner including:

- Faster hot water delivery – up to four times faster
- Fewer fittings, especially behind the wall
- Reduced water and energy waste with properly sized tubing
- Individual shut-off valves for easy isolation of individual fixtures
- Balanced water pressure to reduce chances of hot/cold surges in water
- Flexible ViegaPEX tubing for fast, corrosion resistant distribution lines
- Ten year transferable system warranty
