

GROW

with **Redeem**TM

Your **FIRST** Choice
in CBD White/Private Labeling

WHO WE ARE

PREMIUM HEMP SOLUTIONS AT A COMPETITIVE PRICE

You have a vision of a thriving CBD company. For this vision to be realized, there are numerous hoops to jump through. Formulation, production, processing, branding and a seemingly endless list of details. The good news is you don't have to navigate this endeavor on your own. At Redeem Therapeutics, we have the experience, expertise, infrastructure, talent and creativity to partner with you to develop a brand and product that is unique to you and your vision.

QUALITY

With strict adherence to GMP standards, our success is defined through disciplines like audits, process validation, and cleanliness control that result in repeatable formulations. These practices allow us to create impeccable products. Detailed, written procedures are essential for each process affecting the quality of the finished product. We use documented systems to provide proof that these procedures have been followed at each step in the manufacturing process.

CONSISTENCY

Full Spectrum extracts contain the same variations present in each hemp plant, crop, harvest and biomass. To mitigate this variance, we have established a balancing process that ensures each bottle and formulation have predetermined parameters

and specifications. This is known as our Optimal Spectrum™ solutions. By testing for concentrations and adding terpenes as needed, your oil has the same rich formulation every time. This marriage of nature and science allows for a consistent, robust, and safe CBD product each and every time.

HONESTY

A 2017 study of CBD companies reported that nearly 70% of CBD products were incorrectly labeled. With such errors being commonplace, it is important to know that your products are being delivered by a transparent and trustworthy company. At Redeem, we accomplish this through independent third party testing. These unbiased test results provide you and your customers the assurance that you are getting what you paid for. Test results are provided with each product and can be found online or by scanning the QR code.

TAILORING PRODUCTS AND SERVICES

We have the experience and knowledge to deliver high quality products for your needs. Our production team has over 60 years of direct experience in pharmaceutical manufacturing and FDA compliance and their understanding of industry best practices ensures that our products lead the way in quality and consistency. We can also provide for your product development and marketing needs with our experienced and savvy team who can deliver effective creative concepts with a focus on driving sales.

As the CBD industry grows, more and more farmers are seeing the value (and profits) in being fully vertically integrated and turn their crop into a marketable product. Our services allow farmers to accomplish this while maintaining their focus on farming.

NEEDS

- Hemp Processing
- Facilities & Equipment
- Brand, Labeling & Product Development

SOLUTIONS

Small Batch Distillation, Retail Ready Product

Great ideas often times need help with execution and processes. By working closely with one of our account managers, entrepreneurs are able to carry out their vision by utilizing the various services we have to offer.

NEEDS

- Facilities & Equipment
- Brand, Labeling & Product Development
- Access to Supportive Team Members

Private/White Labeling, Custom Formulation

Getting a small business up and running is challenging. We specialize in assisting hemp companies as they look to enter the market. Whether it's streamlining your processes or reducing overhead costs, our team can get you running smoothly.

NEEDS

- Rebranding
- Product Formulation
- Outsourcing of Services & Production

SOLUTIONS

Logo & Label Design, Custom Formulation

CUSTOM SOLUTIONS FOR UNIQUE CHALLENGES

The services and capabilities included in this document are not all-inclusive. The job of our account managers is to work individually with clients, finding creative solutions to address each unique situation. Additionally, our production team is remarkably innovative at finding ways to deliver the product or service that meet our client's needs. Please contact us to discuss your goals and let's work together to find a solution that meets those goals.

HEMP PROCESSING

We offer small batch distillation services for those with dried hemp looking for either distillate or a shelf-ready product. Utilizing our services gives you the advantage of vertical integration, as we have the capacity to execute each phase of the production process. Please contact us to speak with one of our team members about how we can turn your hemp into the product you desire.

WHITE LABELING

For a refined product that is ready for the shelves, simply choose from our line of full spectrum hemp tinctures. Flavors offered include Mint, Natural, Orange Citrus, and Lemon Ginger. Tinctures are available in the following strengths: 250mg, 300mg, 500mg, 750mg, 1000mg, and 1500mg. Pet formula strengths come in 125mg, 250mg and 500mg in bacon and chicken flavors.

PRIVATE LABELING

Our team can create a proprietary formula reserved for your exclusive use. Our chemists will work directly with you to develop your custom formulation, ensuring that the final product aligns with your parameters and specifications. Each private label scenario and client is unique. Please contact us to discuss your goals and we will provide you with a custom quote.

BOTTLING AND MANUFACTURE

For clients with a fill-ready product, we offer bottling services that will return your distillate to you in shelf-ready condition. All bottles are 30ml in volume, and include a pipette dropper. This service also includes the application of a client provided label to each bottle.

DESIGN AND PACKAGING

Whether you need a marketing brand and presence created from scratch or just your existing brand converted into new packaging, our graphic design team is highly proficient in creating custom designs, instantly adding value to your brand. Work directly with our designers to achieve the style, packaging and branding you are looking for. Stand out from other CBD companies with dynamic packaging. Having a professionally developed packaging solution will showcase your product in a way that helps customers understand its value. Boxes are offered with a matte or soft-touch texture, with up to four color printing. Tubes are offered in white with durable vinyl labels that display your company brand in full color and clarity.

WORKINGS & FAQs

WHERE IS YOUR PRODUCT TESTING DONE?

We use ProVerde Laboratories for our testing, a facility specializing in the analysis of cannabis products. They are an ISO-certified laboratory (ISO / IEC 17025:2017) and are in compliance with USHA (US Hemp Authority). Following testing, the ProVerde team publishes the Certificate of Analysis for the lot on their website. These results are available to you to use as you determine is best.

WHERE DOES YOUR HEMP COME FROM?

We are quite selective about the hemp that we source. Without exception, our hemp is pesticide-free, non-GMO, and organically-grown right here in the United States. Additionally, our hemp is grown with premium seeds, with germination rates just under 100%. Our hemp plants are grown in nutrient-rich fields, utilizing natural sunlight as opposed to artificially-lit greenhouses. We thoroughly vet the farmers that we source hemp from, developing personal relationships and high levels of trust. These relationships help ensure a steady supply of affordable and quality hemp.

HOW MUCH DOES PRODUCT SHIPMENT COST?

The cost for shipping is based on the weight of the order and the shipment destination. Personalized quotes are available from your account manager upon request.

CAN YOU MAKE CUSTOM PRODUCTS NOT LISTED IN YOUR CATALOG?

Definitely. We would love to talk to you about your product ideas. We have facilities with a capacity to make just about any type of hemp derived product. Give us a call!
